Original copies in printed paper covers are filmed  
beginning with the front cover and ending on  
the last page with a printed or illustrated impres-  
sion, or the back cover when appropriate. All  
other original copies are filmed beginning on the  
first page with a printed or illustrated impres-  
sion, and ending on the last page with a printed  
or illustrated impression.

The last recorded frame on each microfiche  
shall contain the symbol ➡ (meaning "CON-  
TINUED"), or the symbol ▽ (meaning "END"),  
whichever applies.

Maps, plates, charts, etc., may be filmed at  
different reduction ratios. Those too large to be  
entirely included in one exposure are filmed  
beginning in the upper left hand corner, left to  
right and top to bottom, as many frames as  
required. The following diagrams illustrate the  
method:

## P R E F A C E.

Says the celebrated Lexicographer JOHNSON: "He that  
"undertakes to compile a Dictionary, undertakes that, which, if  
"it comprehends the full extent of his design, he knows himself  
"unable to perform. Yet his labors, though deficient, may be  
"useful; and with the hope of this inferior praise he must incite  
"his activity, and solace his weariness."

A true saying! PROBATUM EST! If anybody experienced  
the truth of it, I did.

What Johnson says here, is true even in regard to Dictionaries of *civilized* languages; but by far more so in regard to a Dictionary of an *Indian* language, and the FIRST ONE of such a language.

This is, to the best of my knowledge, the first Dictionary of the Otchipwe language ever published. The compilation of it has cost me several years of assiduous labor; and still I must acknowledge that it is yet very defective and imperfect. I consider it as next to impossible to make such a work perfect at once, in the first edition.

In order to understand this Dictionary and make a practical use of it, the OTCHIPWE GRAMMAR ought to be first studied, especially the *Formation of Substantives* and the *Formation of Verbs*; because you will find in this Dictionary only some of the *formed* substantives and verbs, as examples after which you may form others yourself, according to the Rules explained in the Grammar.

The pronunciation of the Indian words in this Dictionary is the same as explained in the First Part of the Otipchipwe Grammar. Here is a short extract of those explanations.

*a* is always pronounced like *a* in *father*.

*e*      "      "      like *e* in *net*.

*i*      "      "      like *i* in *live*.

*o*      "      "      like *o* in *bone*.

*g*      "      "      like *g* in *get*.

*j* has the French sound, as in *jour, joli*, etc.

The other consonants have the English sound.

#### NECESSARY REMARKS FOR THE PROPER USE OF THIS DICTIONARY.

1. The verbs in this Dictionary are given in the first person singular present, (as in Greek Dictionaries,) because there is properly no *infinite mood* in Otipchipwe.
2. In the significations of *active verbs animate*, ordinarily the *masculine* gender only is expressed, and the *feminine* is understood. As: *Nin wabama*, I see him.—It means also, I see her; but this is understood.
3. Verbs ending in *endan, endamawa, endagos*, etc., may also end in *enindan, enindamawa, enindagos*, etc.; which is not always expressed in this Dictionary. F. i. *Nin jawendagos*, or, *nin jawenindagos*, I am happy. *Nokendagwad*, or, *nokenindagwad*, it is soft.
4. The unipersonal verbs ending in a vowel, have ordinarily two terminations, but the same signification in both of them. They end in a vowel, *a, e, i, o*; or they add the termination, *magad*. F. i. *Sogipo*, or *sogipomagad*, it snows. *Kissina*, or *kissinamagad*, it is cold.—In this Dictionary you will find the second termination expressed by a dash and *magad*; as: *Sogipo*, or *-magad*, which means, or *sogipomagad*. And in the participle you will find a dash and *magak*; as: *Swagipog*, or *-magak*, which means, or *swagipomagak*.

## V

5. The *imperative mood* is not always expressed, because it can be easily constructed according to the Paradigms of the Conjugations in the Grammar. But where the imperative is difficult or irregular, it is ordinarily expressed in this Dictionary.
6. Many verbs that are passive in their signification, are neuter in their formation and conjugation, and therefore marked down as neuter verbs. F. i. *Nind inendagos*, I am destined. *Nin nondagos*, I am heard, etc.
7. To indicate the plural of substantives, only the letter or letters are expressed that are added to the singular in order to form the plural; and the dash before these letters represents the substantive. As: *Tchiss*, turnip; pl.-*an*; which means, *tchissan*. *Inini*, man; pl.-*wag*, that is, *ininiwag*.
8. There are some consonants which the Indians don't pronounce distinctly and uniformly. They very often confound the letters *B* and *P*, *D* and *T*, *G* and *K*. It is often impossible to ascertain, by the pronunciation of an Indian, whether the word begins with a *B* or *P*, with a *D* or *T*, with a *G* or *K*. For this reason please mind the short Note you will find at the beginning of each of these letters in this Dictionary. See likewise the Note at the beginning of the letters *O* and *W*.
9. In regard to the *Second Part*, I have to remark that whatever relates to a *substantive*, is to be found under that substantive. As: I have large feet, I have small feet, I have cold feet, etc. Look for all that under the substantive "Foot."
10. Mind the same in regard to *verbs*. The adjectives relating to a verb and modifying it, are to be found under that verb. As: I look angry; I look strange, etc. This all occurs under the verb "Look."

# A.

## A

**A**—This first letter of the alphabet has only one sound in the Otchipwe language, that is, the open clear sound of *a* in the English word *father*. I know it is difficult for an English tongue to believe that the letter *a* has but one sound, because in English it has no less than eight different sounds.\* But still it is so; the letter *a* has only one sound in the Otchipwe language. Some writers of Otchipwe works have even invented a *particular type* to express this letter when it is to be pronounced, (as they say,) like *u* in *sun, but*, etc. But this is entirely incorrect. Once more: The letter *a* has invariably one and the same sound in all the Otchipwe words that contain it; that is, the sound of *a* in *father, ladder*, etc.

**A**—This letter is sometimes inserted in verbs which signify repetition or changing of place; as: *Baba-ija*, he goes from one place to another; instead of *baba-ija*.—*Anotch ainapinewag*, they have different and frequent diseases; instead of *anotch inapinewag*.—*Anotch ainasin nabikwan; enendang sa weduked od aik'kwean*; the vessel goes in different directions; wherever the steersman pleases he steers it.—When the verb to which *a* is prefixed, begins with an *a*, the letter *i* is inserted between the two *a*; as:

\* Q. How many sounds has A?

A. Eight; a long sound, as in *name*; a flat sound, as in *par*; a long broad sound, as in *salt*; a short sound, as in *glass*; a short broad sound, as in *wad*; the sound of *e* short, as in *any*; the sound of *i* short in the unaccented termination *age*, generally, as in *cabbage*; and sometimes the sound of *u* short when unaccented, as in *liar*.—Cobb's Spelling Book.

*Sa*, or *isa*; particle used in answers. It signifies nothing in itself, nor is it absolutely necessary in answers, but usual. (It sometimes signifies, because, or, for; as: *Kitchi kashkendam aw ikwe, gi-nibowan sa onidjanissur*; this woman is very much afflicted, because her child is dead.) It follows immediately the first verb of the answer; and when that verb ends in a consonant, a euphonical *i* is ordinarily (although not necessarily) prefixed to this syllable; as: *Ki nondaw inat? Ki nondor isa*. Dost thou hear me? — I hear thee. (This remark has also report to the interrogation-particle *na*, or *ina*.)

## NOTE.

---

The reader must not expect to find all the words of the English language in this Second Part of the Otchipwe Dictionary, but, of course, only such as can be given in Otchipwe. There are thousands of technical expressions and scientific words in English, (and in every other civilized language,) for which the uncultivated and unlearned Indian languages have no terms.

Many English words are abbreviated in the different articles of this Part, which, however, will be easily understood by the *first* word of the article. For instance, in the article „Abolish“, you will find, „I ab: it“; which means, I abolish it. — And so on respectively.
